

PGR

Vigeo™ is a plant biostimulant that can improve the germination of seeds, plant emergence, root growth, seedling development and plant growth/development throughout the growing season.

Quick Facts:

- Plant growth stimulant for use on field crops, vegetable crops, small fruits, vines, tree fruits, sod, turf, shrubs, non-bearing ornamental trees, flowering plants and ornamentals
- Demonstrated growth stimulant to corn both as an in-furrow application as well as applied foliar
- Soluble in water but can also be mixed directly into many liquid fertilizers for use in-furrow at planting and can also be applied in tank mixes as foliar sprays.

Active Ingredients:

Cytokinin (as kinetin).....	0.010%
Indole Butyric Acid.....	0.005%
Gibberellic Acid (A3).....	0.004%
Other Ingredients:.....	99.981%
Total:.....	100.000%

APPLICATION RATES

- Rate is 2-8 oz./acre depending on the crop and application method

Vivid Life Sciences strives to provide growers with bright ideas in plant performance via innovative technologies in plant nutrition, protection and growth promotion that enhance crop yields. These patented technologies add value to a wide variety of row and specialty crops. With a focus on plant physiology, our agricultural product portfolio offers practical solutions in seed treatment, in-furrow and foliar plant nutrition, advanced biologicals and phosphite fungicides.
