

GROWFORCE[™] Nutriscreen

3-0-0

Guaranteed Analysis

Total Nitrogen	3.0%
3.0% Urea Nitrogen	
Calcium (Ca)	14.1%
Magnesium (Mg)	3.0%
Boron (B)	0.09%
Zinc (Zn)	3.0%

Derived from: Urea, Calcium carbonate, Magnesium carbonate, Boric Acid, and Zinc oxide

KEEP OUT OF REACH OF CHILDREN

DANGER

May damage fertility or the unborn child. Causes serious eye irritation. Causes skin irritation. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear eye protection and protective gloves. Wash hands thoroughly after handling. Avoid breathing fume/mist/vapors/spray. Use only outdoors or in a well-ventilated area.

FIRST AID

IF EXPOSED OR CONCERNED: Get medical advice/attention. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. **IF ON SKIN:** If on skin: Wash with plenty of soap and water. Specific treatment is not applicable. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. **IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Call a poison center/doctor if you feel unwell.

STORAGE AND DISPOSAL

Store locked up. Store in a well-ventilated place. Keep container tightly closed. Dispose of contents/container in accordance with Federal, state and local laws and regulations.

COMPATIBILITY

Growforce Nutriscreen is compatible with a wide range of commonly used agricultural chemicals. When mixing with other chemicals, always mix a small quantity and check for precipitate (fall out) in the mixture. If precipitation occurs, DO NOT proceed with application. If the mixture does not precipitate and it's the first time you have used this combination of products, test a small area of the crop prior to treatment of the whole area to test for phytotoxicity.

GENERAL INFORMATION

Growforce Nutriscreen is intended to assist crops naturally protect itself during times of intense stress from the sun, caused by UV radiation. When applied to crops, this unique combination of nutrients helps the plant create a natural defense mechanism to protect it from harmful UV rays. For best results apply **Growforce Nutriscreen** during the morning hours and allow the product to dry completely prior to irrigating or rainfall. This product can stain clothing and porous material.

DIRECTIONS FOR USE

Growforce Nutriscreen applications should be repeated every 7 to 14 days, depending on rate of use and weather conditions, during normal crops growing conditions. Additional applications may be required under conditions of persistent high temperature, increased UV exposure or other stress circumstances.

MIXING INSTRUCTIONS

Always fill the spray tank to 50% capacity with water before adding any tank mix agent, chemicals or other fertilizers. Add the full required amount of **Growforce Nutriscreen** to the apparatus and add remaining water. Agitation is recommended during the mixing process.

Manufactured for and Guaranteed By:

Vivid Life Sciences, LLC, P.O. Box 41632, Minneapolis, MN 55441

Crop	Rate/ Acre	Comments
Avocados & Mangoes	1.5 – 2 qts	Foliar Fertilization: Apply at bud break and spring flush with follow-up applications through fruit fill as required
	3 – 4 qts	Sun Protection
Citrus	1 – 3 qts	Foliar Fertilization: Apply 3 weeks prior to blossom with further applications 2 - 3 weekly petal fall in oranges and monthly in other citrus fruits up to 3 weeks prior to harvest
	3 – 4 qts	Sun Protection
Ornamental	0.5 – 1 qts	Foliar Fertilization: Apply at 4 - 5 leaf stage
	1 – 2 qts	Sun Protection
Olives	1.5 – 2 qts	Foliar Fertilization: Apply first application 3 weeks prior to bud formation and then from fruit set onwards at monthly intervals.
	3 – 4 qts	Sun Protection
Pome & Stone Fruit	1.5 – 3 qts	Foliar Fertilization: Apply at early spur burst, complete petal fall and post blossom as required. DO NOT apply as foliar on high chill stone fruit varieties.
	3 – 4 qts	Sun Protection
Strawberries	0.5 – 2 qts	Foliar Fertilization: Apply 2 weeks prior to bud formation with further applications fertigated as new flushes appear
	1.5 – 3 qts	Sun Protection
Tomatoes	1 – 2 qts	Foliar Fertilization: Apply every 14- 21 days from leaf stage onwards
	2.5 – 4 qts	Sun Protection
Tree Fruit	1 – 3 qts	Foliar Fertilization: Apply first application 3 weeks prior to bud formation and then from fruit set onwards at monthly intervals.
	3 – 4 qts	Sun protection
Tropical Fruit	1 – 2 qts	Foliar Fertilization: Spray before bud formation. Further applications with compatible spray programs as required
	2.5 – 4 qts	Sun Protection
Vegetables (with fruit)	1 – 3 qts	Foliar Fertilization: First application 2 weeks prior to budding with follow-up applications as required
	1 – 3 qts	Sun Protection
Vines	0.5 – 2 qts	Foliar Fertilization: Apply 1st application one week prior to bud formation with further applications at regular intervals up to veraison. Do not exceed 4x label rate.
	1.5 – 3 qts	Sun Protection
